Does Your Car Limp Along ?

Is it a gamble whether it will start in the mornings ? Does it sputter and wheeze along when you drive slowly—or miss when you speed it up quickly? Are you holding it down to a slow speed because of the clatter and knocks it makes when you drive fast?

Why not drive your car at its best—the most economical way, too? Keep it in shape—Have a good mechanic check it over and enjoy your driving.

Old-Timers' Round-Up Better Than Ever

The night of February 11th brought the Crossfield Old-Timers' fifth annual round-up to a very successful conclusion under the leadership of the Association's very able president, Mr. Geo. G. Murdoch. 207 old-timers sat down to the banquet table and apparently enjoyed very much the good things set before them.

Mr. Scholfield in his old familiar way led the singing.

There was quite a number of people who used to reside in our midst, that came back to renew old acquaintances, among whom were : Mrs. (Dr.) Bishop, Mrs. W. B. Edwards, Mrs. R. L. Boyle, Mrs. McCrimmon, Mrs. J. Gunnsler, Mrs. Brown, Guy Armstrong and many others. These were introduced and welcomed.

At this time Mr. Wm. Laut, chairman of the round-up made mention of those who had passed away during the year into the life beyond, which was fittingly commemorated by standing attention for the period of one minute.

Col. Walker, past president of the Calgary Old-Timers Association, addressed the gathering at some length with stories reaching back to about 1874.

Cappy Smart of the Calgary Fire Department and past president of the Southern Alberta Old Timers, also told his memories of the past.

Archdeacon Sims, president of the Southern Alberta Old Timers' Association, made a short talk in his general way.

Mrs. Price conveyed to the Crossfield Old Timers the congratulations and good wishes of the women's section of the Southern Alberta Old Timers' Association.

Mr. Harold Riley delivered a very interesting and historical illustrated address, dealing with some of the old native customs, and the white men and women that so freely gave their lives for the advancement of Christian civilization in Western Canada and especially that part which is now the province of Alberta.

Mr. Riley also showed a picture of Her Royal Highness Princess, the second daughter of the late Queen Victoria, one of whose names, was given to this Province of Alberta.

After this the program was brought to a close with the singing of God Save the King.

The dance started off with the grand march with about 200 people participating. Mr. Hans Olson and his orchestra provided the music, and by the way the old fellows responded with their feet, hands and face, it was thoroughly enjoyed. The Old-Timers provided a midnight lunch, and with the very excellent music and old time dances the hall was still crowded at 3 a. m. when "Home Sweet Home" brought to an end for another year one of the most enjoyable old time round-ups ever held in this province.

Fred Is Right Again

Fred Stevens predicted that the unemployment situation would improve after the election noise died away, and we are taking our hats off to him, pretty wise old bird. The work seems to have opened up already, we see picks, shovels, hammers and all kinds of tools going to work.

The Next Big Event

Don't forget the entertainment and dance in the East Community hall on Friday evening, Feb. 20th. Professional entertainers have been secured from Calgary and there will be plenty of fun for young and old.

Civic Election

The results of the election for one member of the Village Council held Monday last were as follows :

Ivor Lewis 24, R. Nichol 39, the total vote polled 63, there being no spoiled ballots.

There seemed to be some dissatisfaction among the electors of the Village, on account of the form of ballot used at this election, and in fact some of them refused to cast their vote.

According to the type of ballot used, it would appear that the Returning Officer took for his guidance The Village Act of 1927, in face of the fact that this Act was amended in 1928, which states very definitely the form of ballot that should be used.

The amendment in this connection, as taken from the Statutes of Alberta, Chap. 51, Sec. 190a and 190b as follows :

"190a. The ballot papers may be either printed or written or partly printed and partly written."

"190b. The ballot papers for the election of councillors shall contain the names of the candidates duly nominated, arranged alphabetically in the order of their surnames, etc."

School Fair Assured

The Board of Trade luncheon and entertainment was very largely attended last Monday night in the Masonic Hall, by members and their wives, also a number of school teachers and trustees from the rural schools of the surrounding district. This event was of a special nature in connection with the proposed School Fair.

If you can judge from the appearance of the faces at the table and the noise they made during the community singing we would say that the first two items were a howling success.

Mr. Holten of the Olds Agricultural School lectured on School Fairs and illustrated the work of the children with moving pictures and although the pictures showed signs of some ancient habits, they seemed to convey the idea to the people, with the result that the Fair is a reality, and the officers elected for the first season's work,

President, R. H. Hay
Vice-President, Miss G. Methera
Sec.-Treas., T. Tredaway

Capt. Gibson of the staff of teachers, in the Olds College gave a very interesting address on mountain climbing in the Jasper Park areas of the Rockies, which was illustrated with lantern slides, this was a much enjoyed feature of the evening.

The meeting was brought to a close by singing God Save The King.

Board of Trade Luncheon Enjoyed by Chronicle Reader

In attending the regular monthly session Feb. 9th, of the Board of Trade, it was wonderful to realize the spirit exhibited by the people of the district in management, in response and co-operation.

Congratulations are surely due to those who are directly responsible for such a program, and to the Mayor for his toast to our new guests, the ladies, and to Mrs. Laut for her very able reply on behalf of the ladies.

The talents shown all through was to say the least, not common. The thought came to me, while in the midst of admiring all this, what a blessing would be the portion of our district if this spirit, talent, goodwill and co-operation were exhibited in things eternal.

Bill Fogue said, "listen to me, I have nothing to say."

Viking Fanning Mills

MADE IN 3 SIZES

Canadian Citizenship

The question arises more or less frequently in the minds of thoughtful Canadians whether the obtaining of the rights and privileges of citizenship by people of other than British birth has not, in the past and up to this present time, been made entirely too easy and more a matter of form than the vitally important matter of national policy it undoubtedly is.

There can be no escaping the fact that, in these Western Provinces at all events, thousands of people have taken out naturalization papers, thereby becoming Canadian citizens and British subjects, with no higher motive than to secure title to 160 acres of land to which in all other respects they had become entitled by virtue of having performed the specified settlement and cultivation duties. Hundreds of others have applied for and secured citizenship papers because they found it politic and good business to do so, while hundreds more have taken the same step because of pressure brought to bear upon them to do so in order that they may vote.

Admittedly these are not very high or worthy motives on the part of those thus granted all the citizenship rights and privileges accruing to native-born Canadians and others of British birth. But, on the other hand, is it not a fact that large numbers of men who became Canadian citizens in this place solely to get title to 160 acres of land have, because of that citizenship, a voice in the future of Canada? Indeed, become active, keen and patriotic Canadians of north-of-the-border type? Indeed, have not many others, who became naturalized in order that they might vote, through the very fact that they did possess the franchise and had a voice in questions, begin to study national issues, and work for the advancement and welfare of Canada in a manner they would never have done lacking such franchise?

Undoubtedly these things are true, but, nevertheless, the question remains: Is not even this grafting developments would not have been further encouraged if the securing of the rights of citizenship had not been quite so easy, a mere matter of form, and the observance of a certain amount of official red tape. And, too, it must also be admitted that, while thousands of people who accepted citizenship in a more or less indifferent and haphazard manner have proved themselves wholly worthy of the rights and privileges thus conferred upon them, other thousands have not done so.

It may now be questioned whether Canada was wise to make 160 acres of land the price of citizenship, notwithstanding that it would probably have been even more unwise to have granted full legal title to homesteads to unnaturalized aliens. However, what is past is past and cannot now be undone. But why?

Valuable as the grant of a free homestead may have been, its value is small to that attaching to Canadian citizenship. That is the fact we must realize. Citizenship is the greatest of all rights, and confers the most valuable and precious privileges any person can enjoy. And in the giving or withholding of citizenship, the State may be deciding its own future for good or ill.

Because this is true, there is much to be said in support of the view that no pressure of any kind should be brought on any person to become a citizen; that the act of naturalization should be a purely voluntary act, free from any persuasion or influence. Further, that the State should exercise its prerogative and confer citizenship only upon those likely to prove worthy of it. Finally, that instead of the act of naturalization being a mere formality, it should be made a very solemn act, surrounded with dignity, and the ceremony of administering the oath of citizenship such as to impress upon the applicant a clear realization of what he is doing, the meaning of the pledges given, and the responsibilities he thereby assumes.

It may be necessary to change the present law in order to bring this about. In all probability such change will be necessary. Very well, then; let us change the law. It can do little more than a change of form. But if it be made in the right way, if the privilege of Canadian citizenship be appraised by us at its true value, the whole point of the act of naturalization will be changed, and those seeking citizenship will realize that it is a heritage we guard jealousy, one we do not confer lightly or merely at a price, but one we deem to be the highest privilege within our power to extend to a fellow-man or woman. Then, and not till then, will the words "I am a Canadian citizen" hold the full value of Paul's proud boast of old: "Civis Romanus sum."

Women Soldiers

Mustapha Kemal Thinks Turkish Women Should Bear Arms

The Gazi, Mustapha Kemal, thinks Turkish women should be soldiers. Addressing a girls' normal school at Smyrna, he said there was no reason why they should not bear arms like men.

"Women," he said, "nowadays demand civic right. Every right involves a duty, not the least of which is military service." Not physical consideration, but baseless prejudices actually prevent women from accomplishing military duty.

In ancient times women fought shoulder to shoulder with men. Modern society presents no fundamental obstacle to women becoming soldiers.

Invents Infant 'Plane

Genoese Claims Speed Of Sixty Miles An Hour

An aeronaut, 66 pounds, which converts a pilot into a "flying man" is the brain child of a young Genoese inventor. It consists of two wings, 18 feet wide, a rudder and elevator, and a five horsepower motor. The "plane," which has a small propeller, is fastened to the shoulders and back of the pilot, who wears skis. As the pilot skis along with the assistance of the motor, he gathers enough momentum to take off. The inventor claims a speed of 60 miles an hour for the infant "plane," which has a parachute large enough to bring both pilot and "plane" safely to earth.

New Fruit Not Yet Named

Resembling an orange flattened at each side like a tangerine and having a taste distinctly tangier than the tang of the grape fruit, a new fruit has appeared in New South Wales at a government farm at Victoria. It was produced by cross-pollination of the tangerine and the grape fruit. It has not been named and there is only one tree. It is estimated that it will take seven years to produce a crop sufficient to supply the market.

Should Cut War Budgets

Advocates Plan For Debtor Nations Of United States To Improve Conditions

Edward N. Hurley, who was a member of the Great War foreign debt commission, said in an address prepared for delivery before the Chinese association of Canada, that the 18 debtor nations of the United States should cut their war debts and the United States should simultaneously reduce their war debts.

He said the debtor nations were formerly the best customers the United States had, and that if this country reduced the war debts the same countries would return to United States markets for goods, causing a profitable resumption in industry and export markets.

He suggested a 30-year plan whereby the total reduction would amount to fifty per cent. of the total war debts due the United States, with but a slight tax increase in the United States.

Magnesia Best for Your Indigestion

Most people who suffer either occasionally or chronically from gas, sourness and indigestion, have now discontinued disagreeable diets, stomach tonics, medicines and all sorts of digestives, and take tea, lemonade or fruit jellies or Biscuited Magnesia after meals with the result that their stomachs are in better condition. They also eat more easily and their voices sound better.

Those who use Biscuited Magnesia find it especially good for the meal time because they know this won't interfere with the digestion of any good drink, will not upset the stomach, prevent food fermentation, and make the body feel comfortable.

More Attention Must Be Paid By Hog Raisers To Feeding And Marketing In Best Condition

During the past few years Canadian hog producers have been able to congratulate themselves on the vast improvement that has been made in the quality of their hogs and pork products. Packers have been glad to join in acknowledging to the full this improvement. It meant that producers and packers were enabled to supply the demand for fine quality bacon to a great extent each year.

But throughout this whole period it has been evident that much more attention must be paid to type and breeding than to feeding and marketing in the proper condition and at the most desirable weights. It appears impossible for producers to realize that consumer demand is definite, clear-cut and exacting. It will not take a producer from the producer simply because that is what he happens to have at the time or that he finds it easiest to supply.

In the pork trade there are two requirements of consummate demand,

fatness to an excessive percentage of the heavier weight hogs the result is serious trouble with the consuming trade.

It should thus be abundantly clear why Canadian packers for years have been urging producers to improve their feeding methods and to market hogs at more suitable weights and finish. For several years light weights and lack of finish have been emphasized as undesirable. Now the situation is reversed. Hogs are overfat and the percentages are above the most desired weights. This has made necessary a revision of price differentials between the grades. If the evil continues further steps will have to be taken to correct it. The necessity is not due to any change in consumer demand, but to change in producer supply. The objective is to bring the supply back to the requirements of the demand, just as it was when too many hogs were light and under-finished.

These three cuts of bacon, all from good type of hogs, show the results in the value of different methods of feeding the animals. The differences in thickness of the lean and fat and their relation to each other should be closely noted. The picture shows very plainly how good breeding is spoiled by bad feeding.

The one relates to weight of the cuts, the other to quality of the meat. This demand is almost constant. In the export trade there is an almost constant demand for a certain percentage of Wiltshire sides weighing thirty to fifty-four pounds; another constant percentage for sides of fifty-five to sixty-four pounds, and again another constant percentage for sides of sixty to sixty-four pounds, and so on. In the domestic market certain percentages of the total product of hams or bacon of specified weights are definitely required. A percentage of the trade requires ten to twelve pounds hams, another percentage twelve to fourteen pounds, etc. Similar weights apply to other cuts.

In the same way there is definite demand as to the quality of meat and the amount of fat. The bulk of the trade wants lean, but not too lean, meat. Another section requires a somewhat fatter, but not too fat, meat. To disregard this demand brings heavy penalties from the consumer.

It appears difficult for the producer to grasp these facts or to apply them to his production methods. The result is a varying supply with which to meet a constant demand. The producer is inclined to view it as a varying demand and to complain that he never knows what the market does want. But the situation is very simple. Demand is constant. When the producer is sending to market more light and lean hogs than the percentage required by the trade that absorbs this product, there is a discount on these hogs. When the producer is sending to the market more of the heavier weights, even though not over-finished, than the percentage wanted by the trade using such weights of product, it is the oversupply, not any change in demand, that depresses prices of cuts from hogs of these weights. When, however, the producer adds over-finish to the extent of extreme

The select and bacon grades of hogs in Canada were planned to be in the full range of desirable weights and quality. But it was recognized that the two hundred pounds weight had become the bulk of the demand centered on the cuts from this weight of hog. So, too, certain definite standards of finish are called for. If hogs are fed to normal weights the average variations within the litter give a fair distribution of weights of cuts according to demand. But when, as now, weights are being thrown out of balance through excessive feeding, the large percentage of the heavier and fat cuts resulting is creating very serious difficulties.

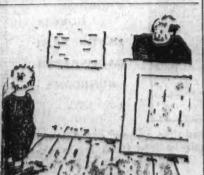

The reason for such variations in marketing weights of hogs is, of course, expediency in feeding. But this is a temporary expedient. The producer has been inclined to believe it is and if feed supplies were low that he was justified in marketing at light weights, and if feed were plentiful he had a right to push his hogs to top weights. But surely the trend of the dramatic events of the past year must give us all pause. If any considerable volume of Canadian bacon had to find a market in Britain the present average quality would render much of it unmarketable. It is with difficulty, even though aided by low supplies, that it is being marketed at home.

In it, then, unreasonable to insist that producers must definitely turn away from expediency to the practice of sound production methods? We are low in hog numbers, but it is short-sighted policy to spoil the few that we have through trying to make three hogs eat the feed that four should consume.

An Incentive To Thrift

New French Clock Runs If Money Is Deposited Daily

An ingenious incentive to thrift—a quality for which the French people are justly famous—is proved by a device recently placed on the market. It is a clock which is at the same time a savings bank. Unless one feeds it a franc, or two francs, or three francs, as the case may be, each day, it will not run. The owner of the clock, if he does not wish the openly accusing face of the timepiece to stare at him heartlessly, motionless, and silently, must therefore make his savings deposit as regularly as he would wind his alarm clock. In an age when time payments can be made on almost anything, the savings clock will probably assist many people in paying their installments promptly.

"A boy who comes smiling to school."—Moustique, Chariot.

Predicts Science Will End Depression

Professor Believes Some New Discovery Will Boost Business

It was predicted at a science symposium, in New York, sponsored by the American Institute, that science will end the current business depression by developing some new product widely used as the radio or the automobile.

It may be, Dr. H. H. Sheldon, professor of physics at New York University, said, ultra-violet light as a substitute for sunlight indoors, arctic weather, aviation safety devices, electric clocks or automatic clippers.

Commercialization of scientific discoveries has ended depression in the past by creating new mass-production industries that gave jobs to the unemployed, said Dr. Sheldon, citing the radio, automobile, telephone, bicycle, electric dynamo and clipper ship.

Children Annoy Parents

Survey In State Of Georgia Finds There 2,124 Ways In Which It Can Be Done

There are 2,124 ways in which children can annoy their parents, declared Dr. Mandel Sherman, director of child research, Washington, in discussing "education for parenthood" at the Georgia State College.

In a survey of 1,000 parents, who agreed to keep an account of the various ways in which their children annoyed them, disobedience received the highest percentage. Other annoyances listed were: Because children were too slow; too quick, or because they "primed up" too much, or because they "pruned up" too much.

Results of the survey showed, Dr. Sherman said, that the way in which a child is brought up determines what he will be later on as an adult. The attitude of the parents greatly affects the kind and number of annoyances with their children.

May Use Bay Route

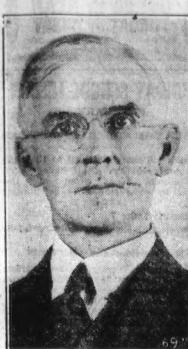

Railways Of Continent Could Be Granted International Rights By Government

If the government grants them privileges, the Hudson Bay Railway would, for a time, be the railway of the continent. J. A. Campbell, K.C., said in an address at The Pas. Mr. Campbell, former member of parliament, was noted as a strong advocate of the bay route, via Churchill, when the route was first proposed.

Canadian National Railways, he said, was operating the line for the time being, but, if the government desired the Hudson Bay route, Canada or the United States running rights over the line to Hudson Bay. The Canadian Pacific Railway, he thought, would likely seek running rights as soon as practical testing of the route is completed.

The select and bacon grades of

Named Auditor

Chester MacDowell, appointed Auditor of Disbursements, Canadian Pacific Railway, from January 1, 1931, entered the service of the railway in 1903 as stenographer in the vice-president's office. In the same year he was appointed secretary to the president, then Sir Thomas Shaughnessy, whom he remained till 1910 when he was appointed secretary-treasurer of the Kettle Valley Railway Company in British Columbia. From 1914 to 1919 he was on military service and in 1919 was appointed treasurer of the Kettle Valley Railway, afterwards becoming controller on promotion to his present post at the beginning of the year.

Some of the speakers were: Gordon Loveridge, Grenfell, on "Calculating the Cost of Gold"; Charles Marion, Mrs. Plains, on "Testing Of An Average Herd"; R. H. Smith, Regina, on "Dollar Dollars Help"; Professor V. E. Graham, College of Agriculture, Saskatoon, on "Some Changes Which Take Place In Cream At Definite Temperatures"; and Dean A. M. Shaw, College of Agriculture, Saskatoon.

Canada Has Stepped Up To Second Place Among Gold Producers Of The World

Cream Grading Competition

New Feature At Annual Convention Of Saskatchewan Dairy Association

Announcement of prize-winners for a women's cream-grading competition, new feature this year, was made at the annual convention of the Saskatchewan Dairy Association held at Regina.

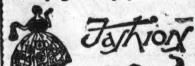

Mrs. Linn Stabbings, Victoria Plains, was announced winner of the first prize, Mrs. Percy Ryan, Regina, won second place.

Winners in the record book competition for boys and girls were also announced: Orville Swenson, Moose Jaw, taking the first award.

In the record books are kept figures showing the monthly production of each cow in a herd of five and the total cost of feeding.

Some of the speakers were: Gordon Loveridge, Grenfell, on "Calculating the Cost of Gold"; Charles Marion, Mrs. Plains, on "Testing Of An Average Herd"; R. H. Smith, Regina, on "Dollar Dollars Help"; Professor V. E. Graham, College of Agriculture, Saskatoon, on "Some Changes Which Take Place In Cream At Definite Temperatures"; and Dean A. M. Shaw, College of Agriculture, Saskatoon.

Winnipeg Newspaper Union

(By Eva A. Tingey.) 7308

DIGNIFIED AND LOVELY

All Tingey models are created and sketched in Paris and the patterns are made in New York.

It is a pleasure to call this beautiful dress, for it has many features which may serve you admirably.

It is wrap over, new, delightful in cut and coloring. The prettiest part of the skirt being carried on into the bodice by means of the graceful scarf.

Various fascinating silks, such as marmin, crepe de chine, satin, etc. can be used for the dress, while deep red, wine and currant shades, green, grey, soft blues, beige, etc., color combinations.

With black, a camelot or two, either white or pink will be a most attractive relief touch to the knot of the scarf. The belt should be of straw. With colors, colored stones give a charming touch. Turquoises, also rubies are very popular.

The belt should be obtained in sizes 16 to 20 and 24 to 42, ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

Among the most keenly debated questions of the present time is the supply of gold available for monetary use and the probability or the reverse of that supply being maintained. In this subject Canada has a double interest, first, as a producer of some importance and, secondly, as a trading nation whose aggregate in proportion to population is the second highest in the world, and whose people are necessarily intimately concerned with whatever is fundamental to world prosperity. In this connection such argument has been expended on the necessity for a more equitable distribution and employment of the existing stocks of gold. Along with this, however, has come a note of real anxiety over the sharp shortage in the gold supply itself, mainly caused by the anticipation of an early reduction in the level of South Africa's output, the mainstay of the world in that respect during the last quarter of a century.

For the total gold output of all the remaining sources of supply in 1929 when contrasted with the situation in 1905, showed a drop of nearly thirty per cent.

In the December issue of Natural Resources the monthly publication of the Economic Department of the Interior, the trend of world gold production is reviewed, and it is noted as of special interest from the Canadian standpoint that in the writings of almost all students of the gold situation "little or no importance has been attached to Canada's rising output. It is true," the writer admits, "that the Dominion's production has never bulked largely in the world's total output, but it has grown, and is continuing to grow, substantially. With gold being produced in larger quantities either from gold properties or from existing properties in which gold is associated with other metals, it may well be that Canadian resources are destined to play a much more prominent part than has yet been foreseen, in offsetting the expected depletion of the South African goldfields and the threatened embarrassment of the world's monetary systems."

It is, therefore, with all the greater interest we learn from an editorial in the Quebec Chronicle-Telegraph that in 1930 Canada produced more gold than any other country in the world except South Africa. It stepped up from third place to second place as a gold producer among the nations of the world. In so doing it changed places with the United States. The Northern Miner estimates Canada's yield last year at over \$43,000,000, and the yield of the United States at \$41,000,000. For some years past, the American production has been gradually dropping and Canada's production gradually increasing. Not a single Ontario gold mine reduced or passed its dividend last year. One gold mine initiated dividends. One declared a 30 per cent. bonus. One declared an extra dividend. And with another resumed dividends after a lapse of two years.

Gold mining is thus an industry, the Chronicle-Telegraph continues, that during 1930, grew in prosperity, contrary to the trend of most other industries. The most important of the most important gold mines are finding bodies of rich ore at unexpected depths. Developments in the new Banrocksburn field seem to point to the beginning of a new and greater era in gold production. In the meantime, prices of base metals show signs of stabilization, so that we may be on the verge of an improvement in nickel, copper, lead and zinc mining. There is even some hope for silver. The action of Mr. E. W. Beatty, president of the Canadian Pacific Railway, in taking the place of Louis Melchett on the board of the Canadian Nickel Company is just another sign of the times. These leading Canadians who have the most reliable sources of information show a reassuring confidence in the natural resources of the Dominion and their progressive development.

Quite Simple

"I am ashamed of my failure to keep abreast of modern science," said the learned professor of zoology to the young housewife. "Take the electric light, for instance. I haven't the least idea how it works."

The young woman gave him a patronizing smile. "Why," she said, "it's very simple, really. You just press a button and the light comes on — that's all there is to it."

"Did you ever lose control of your car?"

"No; my father-in-law paid for it outright."

HOW ONE WOMAN LOST 47 POUNDS OF FAT

"I have been taking Kruschen Salts for nearly 3 months. I have continued taking one teaspoonful in warm water every day. I then weighed 217 pounds, was always bothered with pains in my back and lower part of abdomen and sides."

"Now I am glad to say I am a well woman, feel much stronger, years younger and my weight is 170 pounds. I do not feel tired and I look better than all my friends say."

"I shall never be without Kruschen Salts, will continue taking my daily dose and more. It is the best salt I recommend it is for the great good that is in it!"—Mrs. S. A. Solomon.

"P.S.—You may think I am exaggerating when I mention such a long letter but truly I feel so indebted to you for putting out such wonderful salts that I cannot say enough."

WORLD HAPPENINGS BRIEFLY TOLD

France is beginning to feel the effects of the world depression. Declining revenues are likely to result in a budget deficit of 40 million dollars.

Russia, Germany, Italy and France all have a genuine desire for peace, Lord Cecil declared in the House of Lords during a disarmament debate.

A. F. Ewing, K.C., Edmonton, has been named trial division judge of the Supreme Court of Alberta, replacing Mr. Justice Walsh, elevated to the Appellate division.

Frederick Martin Hale, 66, inventor of the Hale bomb with which the first Zeppelin was destroyed and the first U-boat sunk during the Great War, died in London, England, on Feb. 2.

British manufacturers are realizing that they must vary their products to Canadian tastes, says Sir William Clark, British trade commissioner for Canada.

Revised figures of the British Columbia salmon pack for 1930 give a total of 2,221,819 cases or an increase of more than \$20,000 the year before.

The plan for the formation of a Pacific Chamber of Commerce, embracing all British Empire countries bordering on the Pacific, is meeting with approval, W. E. Payne, executive secretary of the board, says.

Action to expedite payment of the United States award to Victoria sealers, in respect to the Coquihalla claim settled at Washington in 1914, is being asked from Ottawa by the B.C. Government.

British Boys For Canada

Liverpool Education Authority To Send Out Forty Youths To Dominion

The statement that the provincial governments of Canada had informed the British authorities of their ability to take 1,300 boys from Great Britain in the coming year, and would guarantee their placement on approved farms, was made at a meeting of the Liverpool Education authority.

The Liverpool authority decided to send 40 boys to Canada. Presumably the announcement was an outcome of the recent conference of provincial representatives at Ottawa, but representatives in London, England, of the various provincial governments appeared recently to have received no instructions in the matter.

All-Canadian Radio Program

"Canada on Parade" is to be the title of a distinctly Canadian radio program which is being arranged for Dominion-wide broadcast within a few months. Putting on the air the best of Canadian musical and acting talent, and nationally prominent public officials giving brief historical and inspirational addresses, the sponsors say they hope to emphasize the vastness and potential greatness of Canada.

Belfast will have double-deck buses.

W. N. U. 1876

Will Use Ribstone Oil

Canadian Pacific Railway Taking Four Hundred Barrels Daily Arrangements have been completed between Ribstone Oils, Limited, of Calgary, and the Canadian Pacific Railway for the supply of 400 barrels of crude oil daily to the railway from the tanks of Ribstone for their use in maintaining locomotives operating through the mountains between Calgary and Vancouver. The oil will be transported from the field to McLaughlin station by means of a 14 mile pipe line to be built by the oil company, the total expenditure for this and other developments at McLaughlin to reach between \$30,000 and \$50,000. Col. J. H. Woods of Calgary is president of Ribstone Oils, Limited.

Using Wheat For Fuel

Oregon Farmer Finds That Wheat Is a Cheap and Efficient Fuel Out in Umatilla County, Oregon, Peter Weidert, farming between 6,000 and 7,000 acres, most of it wheat, is using threshed wheat for fuel. He says wheat at \$16 a ton makes cheaper fuel than coal at \$20 a ton delivered at his ranch. The wheat makes a hot, dry fire, burns quickly for banking over night, Weidert declares. He says he learned the value of wheat as fuel years ago, when he used it to bank fires in his old steam thresher. Besides saving him money, Weidert insists he is doing wheat growers a turn round by reducing the surplus.

THE SCARF TOUCH

All Tingey models are created and sketched in Paris and the patterns are made in New York.

So many women love a scarf effect that it is now a popular item. It has to be arranged at each wearing and must be carefully pinned into place.

Today's pattern dress caters for a scarf effect which will "stay put"—indeed it is stitched into and is part of the dress. It is charming carried off in a spotted or patterned crepe de chine against plain tweed, tweed jersey or woolens.

For the original dress an orange brown showing a mimicked diamond pattern was chosen. The crepe de chine was in browns, beiges and oranges—the whole rich and warm in tone.

Dress materials with a spotted silk will be smart, or if patterned tweeds were chosen the tie and cuffs should be plain.

Scarf may be obtained in sizes 14 to 20 and 34 to 40. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamp or coin) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

JESUS THE FRIEND OF SINNERS

Golden Text: "Faithful is the saying, and worthy of all acceptance, that Christ Jesus came into the world to save sinners."—1 Timothy 1:15.

Lesson: Luke 7.

Devotional Reading: Romans 5:1-8.

Explanations and Comments

The Sinful Woman's Deed, verses 36-38.—One day Simon the Pharisee invited Jesus to dinner with him, and he thought the host had enough for the carpenter's Son, for he failed to show him. Jesus the civilities due an honored guest. We are still in the same tradition when we rung up between our Lord and the Pharisees, although already far advanced, was not yet complete. A Pharisee could not be found with a family. It had been supposed that this invitation was given with a hostile intention. But this Pharisee's own profession, verse 39, shows he was interested in Jesus and his ministry which Jesus felt against Him.—Gospel.

The woman, a woman of the city, a sinner, entered uninvited, with an alabaster cruse of ointment. Jesus was reclining on a couch in the customary manner of the time. He turned toward the table before him. His bare feet stretched out behind him. His sandals having been removed. This woman had come to kiss his feet. Was it to lay bare her soul, to tell him of her self-abasement, her penitence, devotion, and love? By no means. As far as she was concerned, she did not care, but let her deed show her gratitude for the forgiveness she had already received, or was confident she would receive. She wet her hair and wiped them with her hair, kissed them with her hair, and anointed them with precious ointment. "To appreciate this act," says Dr. G. M. Trebilcot, one of the greatest humiliations for a woman to be seen with her hair disheveled. Similar acts of respect were sometimes but rarely paid to nobility. A man once gave kiss the feet of Rabbi Jonathan, because he had induced filial reverence to his son.

The Pharisee's Criticism, verse 39.—Simon was scandalized at the woman's act and the Lord's acceptance of it. But when Jesus was no prophet, said to the Pharisee, "If I would have detected the truth about the woman and would have scorned her."

The Pharisee's Lesson, verse 40-43.—Jesus showed him that he not only knew the woman's history but that he even read Simon's thoughts. "Simon I have something to say to you." And he told him of his attention. And then he told him His parable of the "Two Debtors": one of whom owed five hundred shillings and the other fifty shillings, as neither of them had with to pay, the lender forgave them both. "Which of them, therefore, will love me more?" Jesus questioned. Simon answered, confusedly, carelessly certainly, with no thought of the bearing of the question. "He, I suppose, to whom he has rightly judged," Jesus said, and then turning toward the woman He questioned, "Seest thou this woman?"

Then Simon and Simon of him omniscient of the ordinary acts of courtesy due a guest—the water for His feet, the kiss of greeting, the oil and anointing, he compared them with the lavishness of the woman's offering. It was evident that, unlike the woman, Simon had no consciousness of sin at all and no repentance, or even a glimmer of divine love.

The Relation Of Forgiveness and Love, verse 47, 48.—"Wherefore I say unto thee, her sins, which are many, are forgiven her, for she loved me. Therefore are two things pre-tensions of these words. One is that her love was the forgiveness. This was Coleridge's thought when he wrote.

"She sat and wept, and with her un-tressed hair wiped the feet she was so blest to touch."

And He wiped off the soiling of desire. From her sweet soul, because she loved so much."

Labor Troubles Across the Line

Says Unemployment in United States Is Growing Worse

Despite the strenuous efforts of the president, Cool Woods, and others to reduce unemployment, this situation, according to William Green, president of the American Federation of Labor, grows worse.

"Unemployment," said Mr. Green today, "has increased since December, and 5,700,000 wage earners in the United States were out of work in the first part of January. This compares with 5,600,000 in December, and these figures do not include farm labor or office workers."

Vancouver Shipping Figures

Vancouver's sea-borne arrivals during 1930 numbered 1,195 with a total of 4,600,802 tons, according to a report of the Vancouver Merchants Exchange. In 1929 Vancouver's arrivals were 1,284 with a tonnage of 4,627,000.

Explosion Wrecked Engine Of Submarine

Twelve Men Injured But Cause Of Accident Unknown

Twelve men were injured, one critically, when an explosion of unknown origin wrecked the internal combustion engine of the submarine X-1, one of the largest underwater boats in the British navy.

She had left Sheerness for a trial run after reconditioning and had gone 20 miles on the surface to the Thames estuary when the blast occurred.

The injured men were treated on the ship and the submarine returned to Chatham on one engine. The extent of the damage was not immediately determined.

The X-1 is of exceptionally strong construction, designed for deep diving and can remain submerged for two and a half days.

The vessel is of nearly 2,800 tons displacement, carrying four 5.5-inch guns and equipped with six torpedo tubes. She has a surface speed of 20-25 knots and carries a crew of 110 men. She cost more than \$50,000. The Navy List gives her commander as E. M. C. Barracough.

When there's too much acid in your stomach, you must force yourself to work, even pleasures are too great an effort. Appetite lags; the digestion is poor; the whole system suffers.

Laboratory tests show an acid condition is due to errors in our modern diet. But you need not wait to diet away your acid. Take a tablespoonful of Phillips' Milk of Magnesia.

This will neutralize the excess acid immediately; make you feel like a new person in just a few moments.

Still Room For Improvement

Carelessness At Railway Crossings Continues To Exact Heavy Toll

A report issued by the Dominion Board of Railway Commissioners suggests that there is still room for improvement in the matter of greater caution at railway crossings. In the last four months of 1930 there were 161 accidents at such crossings. Carelessness on the part of motorists is assigned as the chief contributing cause of these mishaps, and it is again set forth that a toll of many lives is taken every year because of the lack of even elementary precautions.

The Railway Board makes an investigation into every accident at a railway crossing, and the various charged causes for them are grouped as follows: Crossing tracks when gates are down; lack of precaution in not making sure trains are approaching; accidents caused by defective track switches; inattention in becoming stalled in the middle of the track; autos disregarding engine whistle and ringing of engine bell; autos skidding when crossing tracks; chauffeurs seeing train too late to escape a crash; drivers trying to beat track to crossing.—Regina (Evening Leader-Post).

The Railway Board makes an investigation into every accident at a railway crossing, and the various charged causes for them are grouped as follows: Crossing tracks when gates are down; lack of precaution in not making sure trains are approaching; accidents caused by defective track switches; inattention in becoming stalled in the middle of the track; autos disregarding engine whistle and ringing of engine bell; autos skidding when crossing tracks; chauffeurs seeing train too late to escape a crash; drivers trying to beat track to crossing.—Regina (Evening Leader-Post).

Worth Spelling Out

It is gratifying to note that the exact practice of abbreviating the spelling of the word "Christmas" is passing into disuse. In its etymology, its associations, its priceless content, the name "Christmas" is well worth the time, and space takes to spell it out.

Result Is Encouraging

Disarmament Conference Is Making Progress With Its Work

There is encouragement to be found in the results of the Disarmament Conference. The work has been going on for four years and more, and till quite recently agreement did not seem probable on anything like such a scale as has now been achieved.

A framework at least has been provided, and into that framework the World Disarmament Conference, when it meets, should build a more secure and substantial edifice. Only those who expect results far more rapid than the present outlook of the world permits need be depressed by the Commission's results.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but glass.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: JOHN A. CHANTLER & CO., LTD.
51 Wellington St. W.
TORONTO, ONT.

Takes a little whenever heartburn, sick headaches, nausea, flatulence, indigestion or biliousness show the digestive system is becoming too acid. If you feel you take colds and feel sluggish, weak, constipated, Phillips' Milk of Magnesia has a gentle, tonic action.

Delightful taste. Endorsed by physicians for 50 years and prescribed everywhere for men, women and children. The genuine is always a liquid; it cannot be made in tablet form. Always bear the name Phillips for your protection.

Electrical Detector

Discovery May Help To Lessen Rail-way Accidents By Detecting Faulty Rails

Alive, Elmer A. Sperry, the "Iron Wizard" gyro wizard, made ocean travel safer. His latest discovery rises posthumously to rid railroad travel of the disasters due to "rail cancer."

Sperry died a few months ago, while trials were incomplete upon his electrical detector of the invisible cracks in rails, which have been an unending source of fatal accidents since the beginning of railroading.

Harcourt C. Drake, research engineer of Special Products, Inc., reported that the numerous fissures within the interiors of rails, fissures which grow like living things, their presence often unrevealed by such as an exterior scratch, until the rails fall apart.

MAINTAIN BANKS ALWAYS HELPFUL TO THE FARMERS

Toronto, Ont.—Statements made by H. Robert Weir, Dominion Minister of Agriculture, regarding Canadian banks and the financial situation in the West at the banquet tendered to stock breeders and exhibitors by the Canadian National Exhibition recently were replied to by Sir John Aird, president of the Canadian Bank of Commerce, and A. E. Phipps, general manager of the Imperial Bank of Canada.

"The banks always have been very generous with the farmers of the West and they haven't changed their policy," said Sir John in commenting on Mr. Weir's demand that the bankers make their stand clear as to whether or not they will give credit next spring.

Incidents cited by the Dominion Minister were instances in the past in which a farmer and a rancher, both men of standing and large property holdings, had been refused relatively small loans, were referred to by Sir John. Other considerations must have entered in, he said. "If the facts are as Mr. Weir says, the farmers might have appealed to superintendents of the bank at Winnipeg, Calgary or Vancouver," said Sir John. "They had a right to do that; or Mr. Weir might have written a letter to the head office of the bank setting forth the circumstances, and I think everything would have been straightened away satisfactorily."

The president of the Bank of Commerce stated that the bank presented itself under consideration for the proposal for the formation of a company to aid the western farmers capitalized at \$5,000,000 and which it is proposed to have backed up by the government, the railways and the banks.

Mr. Phipps declared that, instead of a shortage of credit to western farmers, the banks had been overindulgent.

Mr. Phipps' statement follows in part:

"The west is suffering from an over-indulgence in banking credit rather than a shortage of credit, with the result that many farmers in Saskatchewan already owe their banks more than three times advances and some of the debts go back farther than that. It is people in this class that are continually clamoring for more assistance from the banks."

"This bank has thousands of customers throughout the west who keep their affairs in proper shape and who are always able to obtain the banking credit they require. But once a farmer loads himself with more debt than he can possibly pay, it is futile for the banks to go on making further advances, which simply means giving away other people's money."

"I repeat that banking credit always has been and still is liberally distributed in the west and in those cases where further credit cannot be obtained, it will usually be sought for government or charitable relief. Nothing is gained by lending more money than a borrower can repay."

"I think it is time that somebody spoke out in the interests of the banks who have, over a period of years, literally put out millions in losses and who have millions in frozen debts negotiated in part and present endeavors to assist the western farmer."

St. Godard Wins Dog Derby

Captures First Prize and Gold Challenge Cup

Ottawa, Ont.—St. Godard, Le Pas, Man., repeated his victory of last year in Ottawa's international dog sled derby. The young "monarch of mush" without a grueling stretch drive by his fellow Manitoban, "Shorty" Rusack, Cranberry Fortage, to capture the \$1,000 first prize money and the Chateau Laurier gold challenge cup.

The veteran from Cranberry Fortage drove over the final 3½ mile leg of the 100-mile race in three hours, nine minutes and 44 seconds. This was three minutes and three seconds better than St. Godard's time; but the lead piled up by the latter during the long heats was enough to give him victory.

St. Godard's elapsed time for the 100-mile derby route was nine hours, 18 minutes and 40 seconds. Rusack required 9:32:30.

Most of the railway and tramway companies in Argentine are now owned by British capital.

Canadian Is Candidate

Brig.-Gen. Critchley Enters By-Election Contest in Britain

London, England.—Although Lord Beaverbrook and his Empire crusaders have had nothing to say regarding the sudden withdrawal of their candidate, Paul Springman, from the by-election fight of East Islington, they have soon filled his place.

Brig.-General Alfred C. Critchley, formerly of Calgary, Alta., has been chosen as the candidate of the Conservatives and of Lord Beaverbrook's United Empire party. With the announcement of his candidature Conservative hopes of a united Conservative vote were shattered.

Brig.-General Critchley was born in Calgary 40 years ago. He served with the First Canadian Division in France, going over as adjutant of the Strathcona Horse. He was later with the general staff. After the war, he was engaged in immigration work in Mexico and Central America. The general vice-president of the British Portland Cement Association and is on the boards of other companies.

Kingston Welcomes Royal Travellers

Thousands Crowd Docks To Greet Prince Of Wales and Prince George

Kingston, Jamaica—Greeted by an ovation from 50,000 persons who crowded the docks, the Prince of Wales and his brother, Prince George, stopped over here on February 4, on their voyage to South America.

On the morning of the day which awaited him on this island, the heir to the British throne found time to open a new golf course at Constant Spring, six miles from here, and to attend a polo match.

In the evening the royal guests were guests of honor at a reception given by Governor Sir R. E. Stubbs and Lady Stubbs at Government House. There they met the high dignitaries of the island.

At the end of the official welcome, the Prince of Wales pleased the crowd by making a short speech. He said that brighter days were ahead and told the Jamaicans to face the future with courage.

The Radio Situation

Department of Justice Investigating Legal Aspects in Respect To Quebec

Ottawa, Ont.—Legal aspects of the radio situation in Canada, with particular reference to Quebec province, are being placed before the Department of Justice for consideration, announcement to this effect was made here.

So far the Dominion Government has not received a copy of the questions which the Taschereau administration is placing before the Quebec courts respecting the claims of the Quebec Government for radio control in that province. When these questions are received, it was stated, they will be considered by the Department of Justice, and a decision will be made as to whether or not the Dominion authorities will be represented at the hearing, which will be held in Quebec.

Airplane Owners Sued

Ontario Woman Enters Action For Alleged Negligence

London, Ont.—The first action at law in Canada in which negligence in driving an aeroplane is alleged was called in the Court of Assizes of Middlesex County.

The accident occurred on July 27, 1933. The aeroplane, belonging to Roy and Douglas Macklin and Harry Peterson, of Sarnia, was making a landing at Port Frank when, it is alleged, its wing struck Mrs. Mary McIlroy, of Parkhill, as she was bathing in the lake. She contends the owners of the plane were negligent in attempting to make a landing in the middle of a crowd of people and claims \$10,000.

May Consider Naval Pact

Britain's Decision Depends On Action Of France and Italy

London, England.—Rt. Hon. A. V. Alexander, First Lord of the Admiralty, declared in the House of Commons, that unless France and Italy adhere to the principles of limitation of naval armaments Great Britain will have to reconsider her present construction program.

The British Commonwealth, he said, was now building 46,145 tons in warships of which 2,656 tons are destined for Canada. France was building approximately 100,684 tons, and Italy 100,777 tons.

NEW ZEALAND 'QUAKE CAUSES GREAT SUFFERING

Auckland, N.Z.—As details of the story of Tuesday's, February 3, "quake disaster in the Hawke Bay region are not yet available today, February 5, New Zealand appeared for the first time to realize the full import of the terrible tragedy.

A dense shadow of death and suffering hovered above the stricken region, but against this dark background stood out deeds of splendid heroism and devotion. Into the dark desolation of the area so suddenly overwhelmed strode doctors and nurses by the dozen, bluejackets by the score, and relief of all manner.

A general order was issued demanding within two days the evacuation of Napier, capital of Hawke Bay province, and centre of the quake. Authorities feared an outbreak of some terrible disease if survivors remained in the once busy seaport town. Arrangements had already been made to evacuate 5,000 women and children to Palmerston, north of Napier.

Messages placed the dead at Hastings between 80 and 100, and 21 identified. Napier had 45 identified dead and scores of bodies lay unclaimed. At least 1,000 were injured, some critically, and other towns in the province were yet to be heard from.

The British cruisers "Dundedin" and "Dromedary" arrived at Napier and Commodore Blake immediately took charge of relief measures. An immediate message from Blake to the "Dundedin," anchored some distance of shore owing to the virtual destruction of Hawke Bay harbor, directed the sailors to lay a minefield of explosives, indicating the commodore planned to blow up all standing buildings to check the advance of flames.

Fire still raged in Napier and Hastings, licking through the ruins of the broken cities while firemen could only watch, helpless because of shattered water mains. The steamer "Tarakan" came from Napier for Auckland with "Tara" and the "Northumberland" was expected to do likewise.

Napier was a scene of utter desolation. Hardly a single structure remained upright. The death toll mounted rapidly as rescuers worked through the debris, finding body after body. It was expected several days would elapse before the exact number of deaths could be known.

Several residents of Napier declared that for two days prior to the "quake" an exceptionally heavy sea was running for no apparent reason. The first shock was preceded by sudden roaring and grinding sounds. Then, it seemed the whole earth heaved convulsively, buildings groaned and bent under the strain, then crashed down in clouds of dust.

BRITISH SPEED KING

War Claims Adjustment

Money Is Found To Be Owning To German Prince

Ottawa, Ont.—As a result of the finding of the Anglo-German mixed arbitral tribunal, which is settling claims with respect to German property, arising out of the war, Canada has credited the German clearing office with the sum of \$69,183. The credit is authorized in connection with real estate transactions involving Prince von Hatfeldt, a German nobleman, and Alvo Von Alvensleben, arising out of the sale of property on Lulu Island in the mouth of the Fraser River in British Columbia. The department of the secretary of state here, in confirming the credit, mentioned that the sum would be set off against some \$100,000 in claims due Canadian citizens in connection with war claims against Germany. cables from London state that the tribunal finds the German prince entitled to claim back payments paid by him on the property.

Captain Malcolm Campbell, British speed driver, who broke the world's record with his 1450-horsepower automobile, the "Bluebird."

Reasoned Optimism

New Vistas and Opportunities For Surveyors and Explorers In Canada

Ontario, Ont.—Reasoned optimism and not pessimism should be the dominant note of public feeling in Canada, Sir George Garneau, of Quebec, told the Dominion Land Surveyors at their annual luncheon here. Sir George was the chief speaker, and gave an historical sketch of the progress of exploration and surveying in Canada from Champlain's time to the present.

Hon. T. G. Murphy, Minister of the Interior, said he was loath to think the Department of Interior had fulfilled its usefulness now that the resources had been returned to the provinces. The surveyors would find new vistas for activity and opportunity of continued service for Canada in opening up the districts north of these provinces. W. Maxwell, president of the Association of Surveyors, was chairman.

CHINA SECURES WHEAT SUPPLIES FROM AUSTRALIA

Tokyo, Japan—China has become a large buyer of wheat and flour and will continue a very important market for wheat in the future, according to Hon. Herbert M. Marler, Canadian minister to Japan. Mr. Marler has just returned from an extended visit to China where he made a careful investigation of that country's trade possibilities.

At present, the minister said, China is purchasing large quantities of wheat from Australia which, owing to the decline in exchange rates, Australians will be able to sell as much as a short ton under Canadian prices.

This factor, Mr. Marler added, eliminates every possibility of Canada and the United States competing with Australia in the Chinese market during the current season.

Mr. Marler is greatly concerned over the danger threatening China from decline of silver prices, and expressed the opinion that unless remedial measures are quickly found, China will soon cease to exist as a market for foreign goods.

Ottawa, Ont.—Reports as to the prospects of selling Canadian wheat to China have been made to Hon. Herbert Marler, Canadian minister to Japan, who recently visited China. The nature of these reports, which were made to the government here, has not been announced. However, recent communications from Canadian trade commissioners in the Orient are understood to have contained much the same information as that in Mr. Marler's interview in Tokyo.

Australia is in a position to sell wheat more cheaply to China than the prevailing prices for the Canadian product. Of course, Australian wheat sold to China will be a market, and will not compete with Canadian wheat in other countries, so that the fact Chinese are buying wheat may help Canada indirectly.

Trade with the Orient was one of the subjects dealt with by Premier Bennett in his speech at Regina a month ago. His remarks, in part, were: "We will by all means in our power strive to secure a great market in the Orient for our products, and I have no doubt we will succeed. Our minister to Japan, Hon. H. M. Marler, is, I hope, at this very hour on his way to China to discuss with the government of that great country the purchase of millions of bushels of our wheat."

BRITISH DRIVER SETS NEW RACING CAR RECORD

Daytona Beach, Fla.—Captain Malcolm Campbell, 46-year-old British racing car driver, established a new record for the fastest mile on the beach of 246.733 miles an hour on the sands of the natural beach speedway here.

Roaring twice over the course in his huge 1,450-horsepower Bluebird machine, he exceeded the previous record by 14.371 miles an hour, and became the first man in the world ever to attain a land speed of four miles a minute or more.

The "previous record was 231 miles an hour established here in 1929 by the late Sir Henry Seagrave, also of Great Britain, who later was killed in a motorboat accident at Lake Windermere.

Campbell was clocked at 246.585 miles an hour on his second run around the course and on his second trial at 244.897. His average speed for the mile-long circuit, which is approximately five-eighths of a mile, was 246.086. The kilometer course was laid out within the measured mile.

Despite the fact that the beach was not in perfect condition, the giant racing car held to the sand and at no time shewed tendency of getting out of its course.

After completing both runs, Campbell expressed disappointment that he had not been able to set a higher record. He blamed the unevenness of the beach and poor visibility for failing to record a faster time.

"I am not satisfied with the record," he said, after he had torn himself away from a huge crowd of spectators and racing officials who swarmed out onto the beach to congratulate him.

"The car has lost some speed in it and I am a bit disappointed that conditions prevented me from going faster."

"The unevenness of the beach held down my speed and the visibility was so poor that I could do no better. At no time during my runs could I see more than 300 or 350 yards because of the haze that hung over the course. My car was picking up speed all the time and I would have gone much faster if conditions had been better."

Campbell declined to state whether he would make an attempt later to raise his own record or let it stand. He previously had said, however, that he planned to make an assault upon the record for five kilometres, and possibly five miles, before his return to England.

Itinerary Is Completed

Tour of Demonstration Train Through Saskatchewan Was Satisfactory

Winnipeg, Man.—Following a successful tour of two months, the seed grain and dairy demonstration train, operated by the Saskatchewan Government, co-operating with the Canadian National Railways, has completed its itinerary. During the tour 42 rural points were visited with a total attendance of 3,061 adults, and 1,330 children. The second half of the schedule was the most satisfactory with an aggregate attendance of 2,048 adults and 871 children at the 20 points visited.

It is believed that the tour will prove invaluable in the preparation of exhibits for the world's grain show to be held in Regina next year. Special emphasis was given to this feature in the lectures as well as to seed cleaning and the results to be obtained from the effective use of the various types of seed cleaners.

Lumber For New Zealand

Extension Of Credit For Stricken Areas Is Advocated

Toronto, Ont.—In order that New Zealand may be enabled to purchase Canadian lumber and building materials for the reconstruction of areas devastated by the recent earthquake, extension of credits will be urged on the Dominion Government by the Canadian Lumbermen's Association.

A resolution naming a committee to lay this request before the government was passed recently by the association in convention here. It carried unanimously without discussion.

Must Pay Own Fare

Mexico City—Foreigners deported from Mexico would have to pay their own fare home, under the terms of a proposal before the national immigration commission here. Those not financially able to do so would be placed in a penal colony where they could earn the necessary funds.

Miss Adrienne Allen, popular young British screen star and the wife of Raymond Massey, the well-known Canadian actor and producer on the London stage and the brother of the Hon. Vincent Massey, the former Canadian minister to Washington, N.Y., who is visiting Canada. Miss Allen won overnight fame in her performance in "Loose Ends" and is shortly to appear in other productions. Her husband also is said to be turning to the screen.

Unemployment In Canada

Pronounced Curtailment Of Employment At the Beginning Of the Year

Canada entered the new year with a "pronounced curtailment" in employment, the Dominion Bureau of Statistics reports. Although there were less persons regularly employed on January 1, 1931, than on the corresponding date in either 1930 or 1929, the total exceeded the number of workers reported in any year from 1910 to 1929.

Reducing the situation to a common denominator, based on returns gathered from 7,511 firms throughout Canada, the bureau computed that the index number on Jan. 1 stood at 101.7, compared with 108.5 in December, and 111.2 on Jan. 1, 1930; 109.1 on Jan. 1, 1929, and 100.7 on Jan. 1, 1928.

Reflecting this reduction in the index number, the firms reporting to the bureau recorded a decrease of 6,250 in the number of persons employed at the first of the year, compared with the number working on Dec. 1, 1930. In manufacturing, construction, transportation, mining, general communications and trade, there were general reductions in employment, while on the other hand, the home industries registered an improvement.

The joint Dominion-provincial-municipal unemployment scheme was given credit for stabilizing the situation to a certain extent by providing work for large numbers of men throughout the country.

The maritime provinces was the only economic area reporting increased employment, the bureau's report noted, due largely to the opening of the winter ports and the seasonal activity in logging, 6,663 more persons being employed on Jan. 1 than on Dec. 1.

Loss of employment to 19,332 persons was recorded by the province of Quebec, due largely to recessions in manufacturing, construction and transportation. The labor forces of the 1,730 firms reporting aggregated 260,675 workers on Jan. 1, compared with 260,007 on Dec. 1, 1930.

Ontario recorded the largest drop in employment of any of the economic areas, 3,339 firms reporting that 30,370 less workers were employed on Jan. 1 than on December 1, 1930. Contractions in manufacturing, construction and transportation paved the way for a drop from 396,622 to 365,232 in the number of persons employed.

Exclusive of farm laborers, the five provinces recorded a total loss of employment of 14,761 workers.

British Columbia, where curtailment took place in lumbering, transportation and in some branches of manufacturing, reported a loss of 4,713 workers. Statistics were gathered from 754 firms, showing that the aggregate payroll dropped from \$8,382 on Dec. 1, 1930, to 75,664 on Jan. 1.

Newest Paris Fad

Is Table Cloth With Maps Embroidered In Colors

The French need no longer be identified as a race which doesn't know its geography. The newest Paris fad is map cloths to cover the tea table. On them are maps embroidered in colors. You can sip tea over Ireland and the Isle of Man or over the old Barbary States, with all the rivers and mountains named. These novel tea-towels are in parchment shade, which makes them look like leaves out of a real atlas.

Hotter Than the Sun

The Westinghouse laboratories recently obtained a temperature of nearly 1,000,000 degrees. This is the highest temperature so far attained. It was created in a special type of vacuum tube. A small spot on one of the metallic electrodes between where an electric arc had been struck, reached this temperature, which is 165 times hotter than the surface of the sun.

"How splendidly she dances the Charleston with her fingers!" — Der Gelehrte Sachse, Leipzig.

W. N. U. 1876

Hot Water Treatment Controls Loose Smut

Method Has Been Found Effective At Experimental Farm

The modified hot water method for the control of loose smut in wheat has been found effective and satisfactory in experimental work conducted at the Indian Head Experimental Farm of the Dominion Department of Agriculture. This method consists of placing the grain in loosely woven sacks and then treating it in water at 86 degrees Fahrenheit for four hours to soften the seed and prepare it for the action of hot water. The grain is then transferred to water at 112 degrees Fahrenheit for exactly ten minutes.

Mr. Wiggan, it will be perceived, rests his contention upon no ethical or altruistic or patriotic ground. His appeal, which will be all the more potent for that, is upon the practical and more selfish ground of "good business." Good business, this is, for the government to initiate a reduction in the debts at this time.

What Mr. Wiggan sees, of course, is that if the United States continues to bleed her European debtors to the last cent, then these European debtors — who are Uncle Sam's customers — will not have very good customers — with which to germinate or freeze.

They Work Together

Breeding and Rearing Young Cattle Of Special Type

In a review of the trend of the livestock industry for 1930 the Dominion Livestock Branch observes that the market demand for fed calves and yearling beef has brought about a change in production activity, of tremendous significance, in the range cattle industry. With the growing preference for small joints and steaks, finishing is essentially a job for the mixed farming area.

If so, then Britain, steadily tightening her belt to pay, and paying a stiffer price than any other United States debtor, might save a great deal of money. The world hardly realizes, or forgets, what payment of these debts (the interest and principal) to the British people... It means that each year they have to dig down for \$165,000,000 and send it to the United States, and that after 1932 they will have to dig down for \$190,000,000. This despite the fact that they cannot collect anything worth mentioning from the nations which owe them.

It is one of the things that makes one read a lot of the professions of the Great War, with all of its talk about comradeship and brotherhood, only to grow sick — Ottawa Journal.

Working On Special Screen

Electrical Experts Using Edison's Idea For Examining Files

Young electrical experts are reported to be working on an apparatus to electrocute files, a special screen connected with a lighting circuit. One contact with the screen puts an end to the fly. The plan is based on Edison's cockroach eradicator one of the scientist's first inventions. While a boy Edison was bothered by cockroaches in his room over a Boston restaurant. He placed two strips of tin foil on the wall, hooked them up with a battery, and killed so many of the pests that he decided to leave the idea unpatented for the benefit of humanity.

Use Airplane For Funerals

Because so many well-to-do settlers in lonely parts of Queensland, Australia, want to be buried in the beautiful cemeteries in the towns, where none of them have family vaults, an airmen here is using a specially-constructed "plane as a hearse. Mourners are able to follow the hearse in passenger planes, attend the burial service and return to their plantations the same day.

Thousands Of People Do Their Best Work After Age Of Fifty

It is a big mistake to say that a man's usefulness has ended when he approaches the half-century mark. It all depends upon the character of the work a person is called upon to do. To me, it is manual labor, everything depends upon physical strength; if it be manual labor, then there is positively no age limit. Thousands of the best executives in the country have gone beyond the Scriptural three-score years and ten and are as good, if not better, than at any previous time in their lives.

Eskimos of the Canadian Arctic have one domesticated animal, the Husky dog.

To Benefit Themselves

Banker Advocates Partial Cancellation Of Allied War Debts To United States

Albert H. Wiggan, chairman of the Canadian National Bank, said to be the largest bank in the world and certainly the largest on this continent, comes out for at least a partial cancellation of allied war debts to the United States. "I am firmly convinced," he says, "it would be good business for our government to initiate a reduction in the debts at this time."

Mr. Wiggan, it will be perceived, rests his contention upon no ethical or altruistic or patriotic ground. His appeal, which will be all the more potent for that, is upon the practical and more selfish ground of "good business." Good business, this is, for the government to initiate a reduction in the debts at this time.

What Mr. Wiggan sees, of course, is that if the United States continues to bleed her European debtors to the last cent, then these European debtors — who are Uncle Sam's customers — will not have very good customers — with which to germinate or freeze.

It is not impossible that Mr. Wiggan, speaking from such a mighty platform of dollars, will get a Washington hearing — a much better hearing than university professors and mere economists and gentlemen interested in world friendship, who appeal to Washington on somewhat higher grounds.

If so, then Britain, steadily tightening her belt to pay, and paying a stiffer price than any other United States debtor, might save a great deal of money. The world hardly realizes, or forgets, what payment of these debts (the interest and principal) to the British people... It means that each year they have to dig down for \$165,000,000 and send it to the United States, and that after 1932 they will have to dig down for \$190,000,000. This despite the fact that they cannot collect anything worth mentioning from the nations which owe them.

It is one of the things that makes one read a lot of the professions of the Great War, with all of its talk about comradeship and brotherhood, only to grow sick — Ottawa Journal.

The Half-Century Mark

Thousands Of People Do Their Best Work After Age Of Fifty

It is a big mistake to say that a man's usefulness has ended when he approaches the half-century mark. It all depends upon the character of the work a person is called upon to do. To me, it is manual labor, everything depends upon physical strength; if it be manual labor, then there is positively no age limit. Thousands of the best executives in the country have gone beyond the Scriptural three-score years and ten and are as good, if not better, than at any previous time in their lives.

CANDIDATES FOR QUEEN OF THE PAS WINTER CARNIVAL

MISS FRANCES FEDERAL

MISS BERTHA ST. GODARD

Success With Package Bees

Professor Mitchener Delivers Talk At Convention Of Manitoba Beekeepers

"Five Years With Package Bees," was the subject dealt with by Prof. A. V. Mitchener, Manitoba Agricultural College, at the annual convention of the Manitoba Beekeepers held in Winnipeg. He pointed out that the package bees imported into Manitoba come from the states of Alabama, Georgia, Florida, Mississippi, Texas and Louisiana. These bees are used to replace colonies which die during the winter time in Manitoba, and to strengthen weak colonies in the spring or to take the place of the colonies killed by the apistar the previous autumn.

Records kept by Prof. Mitchener for five years show that two-pound packages produce more honey than do three-pound packages, and that two-pound packages received before May 1, averaged 167 pounds surplus honey over the five years, while those received after May 1, averaged only 116 pounds surplus honey. Records show that more bees arrived in Winnipeg during the first week of May in 1929 and 1930 than during any other week in the year, but in the 1929 week 50 per cent. of the packages were received before May 1, and in 1930 only 20 per cent. in view of which data beekeepers are not receiving maximum yields from their imported bees. The last week or April Prof. Mitchener thought was the correct time to have the packages arrive, and not later. In comparison with overwintered colonies, package bees for the five years averaged 167 pounds of honey per colony against an average of 159 pounds per colony for those over-wintered. Prices for package bees, he stated, were during the last few years reduced from slightly over \$5 in 1922 to slightly over \$3 in 1930, with prospects of more reduction in 1931.

Brandon Indian School

Modern Residential School For Education Of Modern Children

The modern residential school for the education of Indian children at Brandon, Manitoba, has a fine assembly hall, four dormitories, four class rooms, a large study room, recreation rooms for both boys and girls, sewing room, sun room, hospital ward and nurses' quarters, and a laundry equipped with the most modern hygienic appliances. Adjacent to the school are a number of first-class buildings, one of which the cow barn, is one of the finest in Manitoba. There are also four residences for the use of the school principal and married members of the staff.

Australians Like Chocolate

Chocolate has become so popular in Australia that nearly \$35,000,000 worth was eaten there in the last 12 months, thousands are employed in chocolate factories, and Australian authors and artists were called in to provide romantic names and attractive wrappings.

When a lion and a tiger meet in combat, the tiger wins.

Punishment Seems Just

Woodstock Judge Sentenced Man To Jail For Dodging Debt

Judge J. G. Wallace, of Woodstock, in a recent division court case, condemned the modern tendency to spend money on luxuries while leaving just debts unpaid. He backed up his conviction by committing to jail, for an indefinite period, a man who had refused to pay an amount of \$35 owing upon a judgment summons issued some time ago. Commenting on the man's admission that he had made a down payment of \$35 on a new radio since the summons was served on him, the Judge said:

"You had no right to do it, and for that reason I am committing you to jail until you make some arrangement to pay your debt or are absolutely tired of being in this sort of thing."

It is nothing short of an outrage that some people neglect the paying of just debts to their grocer, butcher, coal man and merchant, while they indulge themselves in the most expensive luxuries. There are people who have been owing bills for years, but they do not hesitate to spend their money for things that they could very well do without until these bills are paid. Such people, of course, have no conscience, no sense of what is right and decent. The only thing to bring them to time is a taste of the law. If a few more jail terms were given to the bill dodgers, it would be much easier for the bill collectors.

What a Comma Can Do

Misplaced Mark Of Punctuation Makes a Big Difference

The word has often been moved to laughter at the misplacing of a mark of punctuation. Tit-Bits produced this one:

The wife of a man who enlisted in the navy handed the pastor of a church the following note: "Peter Bowers, having gone to sea, his wife desires the prayers of the congregation for his safety."

The pastor glanced over it hurriedly and announced: "Peter Bowers, having gone to see his wife, desires the prayers of the congregation for his safety."

The requites for health, however, do not allow for loafing when there is some hardship to be encountered. The most benefit is derived from overcoming the difficulties.

When it comes to walking many and varied are the excuses for neglecting to take exercise. To those who are blessed with feet, instead of cursed with them, an afternoon or a morning walk can indeed be a pleasure. For countless centuries walking was the only mode of transportation. With the advances of progressive science rapid modes of travel, the placing of one foot before another sufficient time to carry one to a given objective, should it be more than half a mile away, bids fair to be forgotten by some of the able-bodied of our generation.

A great number of famous men have been devotees of the open road. Macaulay, Coleridge, Dickens and Thoreau were extremely fond of walking. Medical authorities agree on the great benefits of walking. But it must be done briskly and cheerfully, with full confidence that the result is fine compensation for the discomfort that is encountered in winter.

Criticism Old As Creation

Come to think of it Eve was criticized by Adam; Noah had many critics when he built his ark; Abraham did not escape; Moses had to listen to the children of Israel in their critical moments; Joseph had his unpleasant house and the prophet Elijah had his wife, the Jezebel, wife of Ahab, that he had to run for his life out of a hiding place in the desert. None of those people had easy going; none escaped criticism.

The Greeks played football and called it "epikuros." The Romans took it up and rechristened it "harpastum."

A Good Type Of Investment

Life Insurance Becoming More Appreciated By Public

As in the days of the great Empire can it just as truthfully be said that all roads lead to life insurance.

Almost every type of investment has been put to severe tests in late years and has been found wanting in some respect or other. Never since "black Thursday" of 1929 when the huge tower of speculative investment began to crumble, just about every type of investment has been meeting acid tests — tests of strength; tests of stability; tests of integrity of management; tests of honesty of trusteeship — and almost every one has been found wanting. With records clean from the standpoint of honesty, integrity, fair dealing and peaceful transaction, life insurance deserves a astounding growth. All investment roads are leading to life insurance. From every important angle, the institution of life insurance has met every test and has never been found wanting in a single factor.

To the seeker of high interest rates, the truth of the old adage, "as interest increases, safety decreases," has never been so apparent as in the last year, and the trend of investment is more than ever before in history in the direction of the conservative; therefore, in the direction of life insurance.

Life insurance always keeps its promise, and life insurance, though never before appreciated as such by the public, is an investment. Slowly, but surely, the trend in that direction as a solution of economic problems.

Taking Exercise In Winter

Brisk Walk Beneficial Even When Weather Is Bad

People who are accustomed to take a fair amount of outdoor exercise, complain that it is difficult to maintain the practice during the winter months when snow on sidewalks and roads make uncomfortable conditions.

The requires for health, however, do not allow for loafing when there is some hardship to be encountered. The most benefit is derived from overcoming the difficulties.

When it comes to walking many and varied are the excuses for neglecting to take exercise. To those who are blessed with feet, instead of cursed with them, an afternoon or a morning walk can indeed be a pleasure. For countless centuries walking was the only mode of transportation. With the advances of progressive science rapid modes of travel, the placing of one foot before another sufficient time to carry one to a given objective, should it be more than half a mile away, bids fair to be forgotten by some of the able-bodied of our generation.

A great number of famous men have been devotees of the open road. Macaulay, Coleridge, Dickens and Thoreau were extremely fond of walking. Medical authorities agree on the great benefits of walking. But it must be done briskly and cheerfully, with full confidence that the result is fine compensation for the discomfort that is encountered in winter.

Criticism Old As Creation

Come to think of it Eve was criticized by Adam; Noah had many critics when he built his ark; Abraham did not escape; Moses had to listen to the children of Israel in their critical moments; Joseph had his unpleasant house and the prophet Elijah had his wife, the Jezebel, wife of Ahab, that he had to run for his life out of a hiding place in the desert. None of those people had easy going; none escaped criticism.

The Greeks played football and called it "epikuros." The Romans took it up and rechristened it "harpastum."

Karikaturen, Oslo

"I can't eat this fish. Send for the manager."

"It's no use. He won't eat it either."

— Karikaturen, Oslo.

Aspirants For Honors

Seven candidates have entered the beauty competition to be held in connection with this year's carnival at The Pas. Those competing for honors are: Miss Francis Federal, Regina; Miss Bertha St. Godard, Flin Flon; Miss Irene Bisson, who is employed in the superintendent's office of the Canadian National Railways, at Winnipeg; Miss Lucy Gagnon, of Hudson Bay Junction; Miss Billie Arffman, of Cranberry Portage; Miss Dorothy Moar, of the Canadian National Telegraphs at Saskatoon, and Mrs. Opal Harvey, The Pas. — Photos by Canadian National Railways.

Help yourself to PARKER HOUSE ROLLS

Try this Recipe

1 cup scalded milk 1 saltspoon salt
2 tablespoons butter ½ Royal Yeast Cake dissolved in
1 tablespoon sugar ½ cup lukewarm water

To the scalded milk add the butter, sugar and salt. Allow it to cool until lukewarm and then add dissolved yeast and ½ cup flour. Stir well and let stand in moderately warm place overnight. In the morning add enough flour to hold together and then divide the dough in half, then roll out ½ inch thick. Cut with biscuit cutter and brush each piece with melted butter, crease through the center and fold over. Let rise again until double in bulk and bake for about 25 minutes in moderate oven. Above is sufficient for about ten rolls.

If you bake at home, write to Standard Brands Limited, 100 King St., Liberty St., Toronto, for free Royal Yeast Cake. It contains tested recipes for Lemon Buns, French Tea Ring, Dinner Rolls and many other delightful varieties of bread.

ROYAL Yeast Cakes

make all breads taste better, look better and keep better. For over 50 years they have been the accepted standard of quality wherever dry yeast is used in home baking.

Keep a supply handy. Each cake is sealed in waxed paper. They will keep for months.

"Buy Made-in-Canada Goods"

Canada's Glacial Period

Covered With Ice a Mile Deep At One Time

A story of the time when the levels of the Great Lakes were 50 feet higher than today, and when the northern part of North America was covered with ice a mile deep, was told members of the Over-Seas Club by Dr. Thomas H. Clark, professor of paleontology at McGill University, Montreal.

Before the last glacial period, the Great Lakes did not exist, said Dr. Clark. Niagara Falls was non-existent and where Lake Ontario now lies was a river, called by geologists the Laurentian River, which followed the present course of the St. Lawrence River, but was larger. The country then had a milder climate than to-day, he said.

The glaciers left three lakes, one near the lower end of Lake Michigan, one near Lake Superior, and one near the lower end of Lake Erie. Later changes filled out the outlines of the lake system as we know it today, but at a higher level, said Dr. Clark.

The position of Niagara Falls is changing rapidly, said Dr. Clark, moving southward up the Niagara River at the rate of five feet a year, as the water breaks down the limestone.

After the melting of the glacier, the sea flowed in and covered the St. Lawrence valley, said Dr. Clark. Proof of this is found on Mount Royal, 600 feet above the present sea level, the finding of the skeleton of an Arctic whale at Smith's Falls, and the finding of marine fossils all throughout the area.

If baby has COLIC

A CRY in the night. Colic! No cause for alarm if Castoria is handy. This pure vegetable preparation brings quick comfort, and can never do harm. It is especially good when children are ailing. Whether it's the stomach, or the little bowels; colic or constipation; or diarrhea. When the baby's cry is sharp, the breath is bad. Whenever there's need of gentle regulation. Children love the taste of Castoria, and medicines made从此 for frequent use.

And a more liberal dose of Castoria is always better for growing children than strong medicine meant only for adult use.

CHAPTER X.—Continued.

Gary tugged from the window, her throat aching with an intolerable pain. The lightning was intermittent now, and the thunder merely a distant growl. She went into her dusty kitchen and heated tea for baby Nellie, gave Sonny his supper, and leaving the soiled dishes where they were, put both tired little boys to bed.

"Me wants Daddy," said Sonny sleepily, as she tucked him in. "Me wants Daddy—tebby."

Gay kissed him, and held him close.

"Mother wants Daddy, too, little boy," she said gently. "When you wake up he'll surely be here. Now go to sleep. Think how glad Daddy'll be to see us in the morning!"

She went into the next room, and for a long time busied herself with unimportant things, because she dreaded to go to the lonely rooms below. But at last she braved them, and an hour slipped by while she washed the dishes, and cleared away the remains of Nick's hasty meal. She tried to eat something herself, but the food choked her. It was still raining, the shower having settled into a steady downpour that threatened to last all night. She swept the kitchen at last, and dusted the living-room and hall, her ears alert for the long-drawn wail of an automobile; but it did not come.

"I hope Nick took an overcoat," she thought aloud. "He's so careless sometimes, and it was warm this morning. . . . I do hope they're almost home. . . . It must be horrible driving a car in such a rain. . . . I wonder if they took chassis. . . . This mud will make slippery going. . . . I hope he won't drive too fast. . . . It's queer how late perhaps—perhaps there's an accident."

She thrust back the thought in horror; but as such thoughts will, it kept returning, just as her steps returned to the window, although she could not see beyond the glass. At last, in an effort to calm herself, she seemed suddenly alive with noises; creaking boards that seemed like stealthy footfalls—branches snapping against

MOTHER OF TWINS HELPED

Restored to Health by Taking Lydia E. Pinkham's Vegetable Compound

Mitchell, Ont.—"I had little twin babies and for quite a while after I was so weak that I could not do my work. I had pains all the way up my legs at the back. I had to sit in a chair and got very little sleep. I took Lydia E. Pinkham's Vegetable Compound and soon was able to get up and do my work. I have had no trouble since."

"And I am fine, do my work without trouble and am gaining in weight and strength. I am greatly obliged to Lydia E. Pinkham's Vegetable Compound to anyone."

Mrs. F. STATION, Box 220, Mitchell, Ont.

W. N. U. 1876

I know anyway, that at three this afternoon they were all right. I—I saw them."

It surprises the question broke from Gay's lips involuntarily, though in another moment she would have wished that her tired babies would awake and demand attention. Anything would be better than this solitude.

It was then that a sharp rap on the old brass knocker startled her. She ran to the door, but her hope that it might be Nick was dashed when she saw James Halliday standing on the porch. In the dim light his face looked grey and drawn, and a faint smile over her that he had brought had news. Then he said: "Have you heard from your husband, Mrs. Hastings?"

He stepped inside, laying his wet hat upon a chair, while Gay led the way into the living-room, and sank down weakly. That moment of fear had wrought havoc with her newly minted nerves.

"No," she answered. "He doesn't know I'm here. He wasn't expecting me till Wednesday; but we had a chance to come to day by automobile, and it seemed best. Have you heard from Mr. Hastings?"

He smiled grimly.

"I, too, was away, you know, and not expected until morning. We seem to be in the same box. Did you by any chance know anything about this trip?"

Then he hadn't known! No, thought Gay, they were not in the same box. And yet . . .

"Why, yes," she answered, pulling herself together. "Mrs. Hastings telephoned me Friday night. He'd been dining with Mrs. Halliday, and she expected some friends for the weekend, and wanted to take them to Mrs. Halliday's. I thought that she intended to drive the new car, and asked Nick to sit in it; but I understand from Julie Nipps—that they went—alone."

It was the hardest thing that Gay had ever done, to face James Halliday then. But she did it, lifting her eyes honestly to his in a glance before which his own eyes dropped.

"I see," he said shortly, and arose, walking to the window and peering out into the night. He glanced at his watch, and coming back sat down.

"The storm has probably delayed," he observed, "and since they don't know where he and will send no message, there is nothing to do but wait. Even then, I don't see how this can be much longer. Are you alone?"

"With only the children, but—but I shan't be nervous if they come soon."

He said, after a thoughtful moment: "I'm sorry, but I sent Julie home for the night when I returned. She'd been at the house all day, so I told her to go. If I'd realized that you were alone I would have sent her here."

It came to Gay in a surprising flash, that in spite of James Halliday's cynical mouth and hateful stories, he was really kind. He had come from his mother's funeral, and only an empty house, yet he was thinking not of himself, but of her. She looked up gratefully to find him brushing a weary hand across his brown hair.

He drew a quick breath, as if surprised at her sympathy.

"Thank you," he said simply. "It has been a hard day, and—." He broke off suddenly, then added: "Mrs. Hastings, I think I ought to tell you something. I know we're both having the same thought—that an accident may have delayed them, because accidents are no uncommon thing. But

unduly upset. Tire troubles sometimes make long delays, and if this shower struck them, it would have meant slow going. Do you want me to stay longer, or would you rather be alone? surely we would have been notified had they met with an accident after I saw them. The sensible things is to go to bed and to sleep."

"Could you?"
(To Be Continued.)

Electron Tubes

Stem Power That Performs Many Marvelous Duties

Industry is rapidly substituting

beams of light for some of the clicking cogs of its machines.

Electron tubes are introducing this silent power.

The tubes are called this "Tetrod" type, and are the well-known photo-electric "eye."

Some of them turn on street lights; read temperatures of hot furnaces; furnish automatic train control; turn out electric signs, and a host of switches for motors.

The "Tetro" twins" are called to the American Institution of Electrical Engineers by W. R. King, of the General Electric Company in New York.

Newspaper Advertising Profitable

British Radio Manufacturers' Association Makes Successful Deal

After years of experiment, officials of the British Radio Manufacturers' Association are convinced that newspaper advertising is the most profitable form of sales promotion.

The association, representing leading British radio and allied manufacturers, spent \$5,000,000 in advertising in newspapers during 1930, it was announced recently, and during that period the manufacturers' turnover increased 40 per cent. The official "revels" that the investment of \$5,000,000 has yielded dividends in total business to the extent of \$30,000,000."

Sweet and palatable. Mother's Worm Powder is acceptable to children and does its work surely and promptly.

Plant Store Water

Vine In Arid Regions Can Store Sufficient Water To Last 15 Years

A vine in the arid regions of Arizona and Sonora stores water in an expanded base in such quantities that it has been known to live on its reserves for 15 years, said Dr. T. MacDougal, director of the Desert Laboratory at Tucson, Ariz., said recently in a radio talk on "The Thirst of Plants."

"A tree cactus," he added, "may hold many hundreds of gallons of surplus water. Many plants in that region have now a water supply laid in which would keep them alive until 1933 or 1934. An acre of cabbage will use 2,000,000 quarts of water in a season, and 200 beets trees on an acre require nearly double that amount. One of these trees loses about 80 quarts of water as vapor daily from its leaves."

Canoe Finance Work

Though the B.C. Government favors a limit to the Peace River, its numerous resources prevent it undertaking the work of extending northward the publicly owned Pacific Great Eastern Railway.

Guise—"So you sing in a quartet now?"

"Fuss—"I do. The other three merely an in."

Double-deck interurban cars have appeared in England.

Miller's Worm Powders will purge the body and stimulate the system so effectively and so easily and painlessly that the most delicate stomach will not feel any inconvenience from their use. They are a preparation given to mothers as a preparation that will restore strength and vigor to their children and protect them from the debilitating effects which result from the degradations of worms.

You must be true thyself.

If thou the truth wouldst teach;

Thy soul must overflow, if thou

Another's soul wouldst teach;

May the truth be full speech.

Think truly, and thy thoughts

Shall the world's fairest feed;

Speak truly, and each word of thine

Shall be a fruitful seed;

Live truly, and noble shall be

A great and noble creed.

—Horatius Bonar.

We know no truth except by action. We can teach no vital truth except through the life. We cannot attain to the eternal joy except as we walk step by step in the path of actual duty and performance in which He walked, who so gained its fulness, and sat down at the right hand of the Father.—Theodore S. Munger.

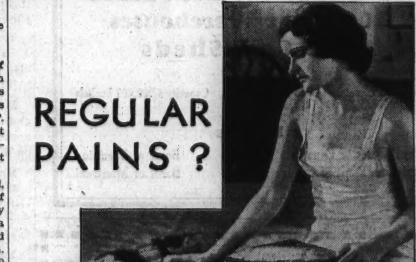

Douglas' Egyptian Liniment is remarkable in its quick, effective action. Relieves instantly burns, sprains, toothache and neuralgia. Invaluable for sore throat, croup and quinsy.

Todays' Best Story

Two hundred years ago, a Danish child of five, Christian Heinzebeck, was the most-talked-of child in the world.

He was able to speak within a few hours of his birth, at ten months he could converse intelligently on most subjects, and when he was a year old he had become thoroughly acquainted with the Old Testament.

Ill-health caused his death at the age of five.

REGULAR PAINS?

SOME women suffer more than others. Often, when there isn't any need! The pains peculiar to women may be relieved as easily as other pains, through Aspirin tablets.

These tablets are always a big help at such times, and never the least bit harmful. (Aspirin does not depress the heart.)

Of course, you are familiar with the use of Aspirin for headache. It brings such prompt

relief that sudden headaches needn't upset your plans. It will check a cold, or ease the sore throat; and comfort the worst sufferer from neuritis and neuralgia.

When your head aches—from any cause—when a cold has settled in your joints or aches, or feel those deep-down pains of rheumatism, sciatica, lumbago, take Aspirin and you can count on real relief.

ASPIRIN

Local and General

The death occurred on Feb. 11 of Victor Riep the infant son of Mr. and Mrs. Alexander Riep of the Beiseker district. Death resulting from influenza and pneumonia.

R. M. McCool came down from Edmonton on Monday evening to attend the old-timers celebration. Milt says that it was the best ever had and that is saying a whole lot.

Mrs. Hepworth and daughter Helen who have been visiting the former's parents Mr. and Mrs. Willis left for their home at Bonner Ferry, Idaho, on Saturday last.

The regular meeting of the Floral F. W. F. A. will be held at the home of Mrs. Montgomery on Wed., Feb. 18th at 2:30 p.m. Answer to roll call—"How to increase our Membership?

Harold Sharp who has been seriously ill for the past 3 weeks is reported much worse today (Friday). His parents received a hurried call to the General Hospital early this morning.

The Bible Class, held at the home of Mr. and Mrs. Hewitt on Tuesday evening was well attended. The next meeting will be at the home of Mr. and Mrs. S. G. Fleming, weather permitting.

The annual meeting of the electors of the municipal district of Rosebud will be held in the Masonic Hall, Crossfield on Saturday, February 21st, at one o'clock p.m. when the annual report will be presented with the auditor's statement.

Oneil News

Mr. and Mrs. Garnet Oneil entertained 50 players at Oneil schoolhouse on Friday evening, when the Oneil "500" Club met to play off the first series of finals. The final prizes were awarded to Mrs. C. Fox and Charles Aldred. The final consolation to Mrs. C. Jones and C. Fox.

The evening prizes were won by Miss Oneil and C. Jones. Congratulations by Mrs. McIlhagga and C. Fox. After refreshments were served, dancing continued until 2 a.m.

The Club is looking forward to the time when the cashier and book-keeper entertain.

THURSDAY, FEBRUARY 12th

Local and General

Mrs. L. M. Casey is visiting her son Ivan in High River.

I. Lewis was a visitor in Calgary on Monday.

BORN—To Mr. and Mrs. W. K. Gibson on Tuesday, a son.

Mrs. J. M. Williams was a visitor in Calgary on Saturday.

Jim Williams expects rain, he heard a custer this week.

Mrs. Jarman and Phyllis were visitors in Calgary last week end.

Miss E. Seville spent Saturday in Calgary

The editor's wife and daughter were in Calgary on Saturday.

Mr. and Mrs. Bert Lilley were visitors to the city on Saturday.

H. McCaskill, contractor, has started work on the Crossfield Garage.

Don't forget the C.G.I.T. Valentine Tea, Feb. 14 in the U. F. A. Hall.

BORN—To Mr. and Mrs. Ivan Casey at High River on Feb. 8th, a daughter.

W. E. Spivey has moved his electric incubator to Haven's building. Watch the chickens.

Miss Mabel Young left on Wednesday for Macleod to visit her parents.

Mr. and Mrs. Lee Ableman were Calgary visitors on Saturday.

Miss Margaret Murdoch and Miss Ruth Stauffer were visitors in Calgary on Saturday.

Bill Emerson visited H. Ballam in the General Hospital, Calgary, on Sunday and reports Hugo doing very nicely.

As we go to press we have just learned of the death of Harold Sharp. Funeral will take place in Crossfield on Sunday.

Mrs. Overby's friends will be glad to know that she came home on Sunday and that she is improving.

We are very pleased to know that Doug Hall is home from the Col. Belcher Hospital, and we hope he will enjoy better health.

Gordon Purvis flooded the curling ice on Tuesday evening and it is possible that we might get in the odd game yet.

The Women's Guild are holding a tea and sale of home cooking, also an apron sale in the U. F. A. hall on Saturday, April 4th.

Mr. and Mrs. P. C. Griffiths and family were visitors at the home of Mr. and Mrs. J. R. Laut on Sunday.

Mrs. Geo. Murdoch is leaving today (Thursday) for Vancouver to visit her mother who has been ill. She will also visit her brother in Seattle, Wash.

You must tell 'em to sell 'em. Wm. Laut advertised a week-end special on oranges and on Saturday day alone sold over thirty dollars worth. You bet it pays.

Mrs. L. Overby extends her heartfelt thanks to those who so kindly showed their sympathy and kindness by sending flowers or cards during her recent illness.

Miss Cecilia McAnalley, R. N. of Jasper and Mrs. Angela McAnalley, R. N. of Edmonton are visiting their parents Mr. and Mrs. P. J. McAnalley.

Evert Bills is loading a carload of wheat over the platform today (Thursday). He was fortunate to sell just before the market dropped 3 cents.

Milt is Doing Good Work

We notice by the Daily Press our M.L.A. Mr. McCool was on the floor of the Legislature. He was advocating a five dollar reduction in the auto license fee, this no doubt is a step in the right direction. He also advocated a revision in hail insurance. We believe some changes will have to be made in the hail insurance policy if it is going to be saved to the farmer.

Mr. Collicutt is graciously

Public Spirit

Mr. F. Collicutt has graciously donated one pure bred yearling heifer, each year for the next five years, as one of the prizes, to be awarded in connection with the School Fairs, the first of which will be held in this district next September, and each succeeding year.

Mr. Collicutt is certainly to be commended for his big hearted attitude towards the welfare of our district.
